

how can I have VOIP

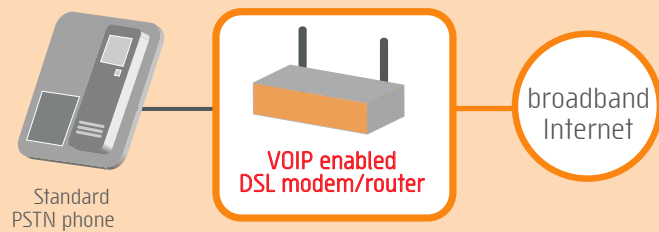

VOIP = Voice Over Internet Protocol
PSTN = Public Switched Telephone Network

— on-net (means on the Internet)
— off-net (means off the Internet)

VOIP with your home phone

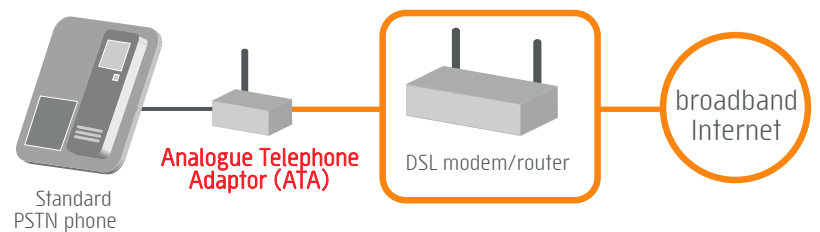

you can have VOIP with your standard PSTN home phone by one of the following methods.

- a** you will need to purchase a VOIP enabled DSL modem/router for VOIP to work with your standard PSTN home phone.

or

- b** if your DSL modem/router is **NOT** VOIP enabled you will need to purchase an **adaptor** (ATA) for VOIP to work with your standard PSTN home phone.

how calls get to you

calls come to you from different methods.
